Abstract (en)

[origin: EP3437877A1] A liquid cartridge includes: a cartridge casing having a liquid storage chamber defined by a front wall, a rear wall, a bottom wall, a first side wall, and a second side wall; and a liquid supply portion; a top wall; and an accessed member. The liquid supply portion has a liquid supply hole extending from the liquid storage chamber to the outside in a forward direction. The front, rear, first side, and second side walls are formed of a material permitting the liquid stored in the liquid storage chamber to be visually recognized from the outside. Each of the front, rear, first side, and second side walls includes a portion forming an outer wall of the cartridge casing exposed to the outside of the cartridge casing. The accessed member is disposed upward relative to the liquid storage chamber and accessed from the outside.
