Abstract (en)
[origin: EP3438329A1] A cathode stripping machine (3) comprising a first operating level (1) comprising an infeed mechanism (4) of the cathodes (5) to the machine, a first transfer mechanism (8.1) for transferring said cathodes inside the machine, a treatment mechanism with a stripping head having two stripping frames (7), each acting on one cathode simultaneously, a second transfer mechanism (8.2) for transferring the cathodes, and an outfeed mechanism (9) of the sheets. The machine further comprises a second reception level (2) located below the first level, comprising, for each of the resulting sheets, a sheet reception system (10), a conveyor belt (11), and a sheet removal station (12), as well as a shared collection and weighing table (13) with rollers for both sheets.
