Abstract (en)  
[origin: CA3018023A1] The present invention relates to a mixing shaft (1) having a tool holder (2) and having a mixing vane (3), wherein the tool holder (2) has a recess in which a section of the mixing vane (3) is fastened. In order to provide a corresponding simple mixing shaft (1) with tool holders (2) which reliably permits individual exchange of individual mixing vanes in a simple manner, it is proposed according to the invention that a clamping part (11) inserted into the recess is provided for fixing the mixing vane section in the recess, wherein clamping part (11), recess and mixing vane section are designed such that a non-positively locking connection of the mixing vane in the recess is realized by means of the clamping part (11).
