Abstract (en)
[origin: WO2017174673A1] The invention relates to a method for controlling a display means (22A, 22B) on board a motor vehicle (20), characterised in that the method comprises: a first step (E1) of determining the imminent opening of a door (50), comprising verification that at least one parameter representative of the imminent opening of a door (50) of the motor vehicle (20) meets at least one predefined condition; a second step (E2) of formulating a display order that is triggered when the predefined conditions are met, and during which an electronic control unit (46) transmits an order for a pictogram (40) indicating the imminent opening of a door (50) to be displayed on the display means (22A, 22B).
