Abstract (en)
[origin: WO2017174408A1] The invention relates to a method for operating a vehicle, wherein said vehicle has a surroundings sensor system and at least one at least partially automated driving function, comprising the steps of: detecting (102) an object state by means of the surroundings sensor system at a first point in time; detecting (103) an object state by means of the surroundings sensor system at a later second point in time; adjusting (104) an activation state of the driving function on the basis of the detected object states.
