Abstract (en)
[origin: WO2017174931A1] A chair (2) comprising a seating surface (6) and a guard rail (13) comprising a safety bar (14) and a support element (15) fixed to the safety bar (14) and extending transversely to the safety bar (14), the safety bar (14) being configured to extend at least partially in front of a seated passenger when the guard rail (13) is in the lowered position, and the support element (15) being configured to extend between the legs of a seated passenger when the guard rail (13) is in the lowered position. The support element (15) comprises a first footrest (17) and a second footrest (18) which footrests are configured to be vertically offset from one another when the guard rail (13) is in the lowered position.
