Abstract (en)

[origin: WO2017174575A1] The invention relates to a metal fitting for a toe board of a scaffold, comprising a metal fitting body (30) extending from a first metal fitting body end region (32) designed for connection to a toe board (10) and/or connected to a toe board (10) to a second metal fitting body end region (34) designed for securing to a scaffold in a longitudinal direction (LK) of the metal fitting body, wherein at least one securing protrusion (42, 49) is provided in the second metal fitting body end region (34) and extends substantially in the longitudinal direction (LK) of the metal fitting body, characterised in that at least one support protrusion (40) is provided extending in a first transverse direction (Q1) transverse to the longitudinal direction (LK) of the metal fitting body.
