Abstract (en)
Lighting device (1) for vehicles including a main lighting module and a plurality of secondary lighting modules arranged side by side within an housing body (2), the secondary lighting modules (6,7,8) being rotatable relative to the housing body and to the main lighting module, around respective first axes (A,B,C); the secondary lighting modules and the main lighting module are constrained to the housing body (2) rotatable relative thereto around second axes (D,E,F,G); a first sub-assembly (18) being formed by the secondary lighting modules, by a link rod (29) connecting the latter together and by a first motorized actuator (19) configured to rotate the first lighting modules (6-8) around the respective second axes; and a second sub-assembly (20) being formed by the main lighting module (5) and a second motorized actuator (21b) configured to rotate the main lighting module around the second axis (G) thereof independently of the first motorized actuator (19) and the secondary lighting modules (6-8).
