Abstract (en)
[origin: CN109737101A] The invention describes a heatable housing part (1), having a pipe heating part (2). The pipe heating part is thermally conductively connected to the housing part (1), in particular to the housing part (1). The heatable housing part also has a thermosensitive circuit part (7a) fixed to a carrier part (6a) thermally conductively connected to the pipe heating part (2), wherein the carrier part (6a) rests against the pipe heating part (2) and the housing part (1) to which the pipe heating part (2) is connected.
