Abstract (en)

This application proposes an improved cooker hood and an electrostatic adsorption apparatus (1) applied to the cooker hood. The cooker hood proposed in this application includes an electrostatic adsorption apparatus (1) and a power supply module (2) supplying power to the electrostatic adsorption apparatus (1), and the power supply module (2) includes a power supply circuit and a switching element (12) for controlling on and off of the power supply circuit; when the electrostatic adsorption apparatus (1) is mounted to the cooker hood, the electrostatic adsorption apparatus (1) abuts against the switching element (12), the switching element (12) switches on the power supply circuit, and the electrostatic adsorption apparatus (1) is electrically connected to the power supply circuit; and when the electrostatic adsorption apparatus (1) is detached from the switching element (12), the switching element (12) switches off the power supply circuit. In this way, it can be insured when the electrostatic adsorption apparatus is removed from the cooker hood, the power supply circuit is switched off.
