Abstract (en)  
This invention relates to a mechanical razor head (2) for attachment upon a handle (3) comprising a razor head housing (24) that comprises: at least one of razor blades area (20) having an intended direction of movement (25); at least one upper roller (21) and at least one lower roller (22) being positioned at the upper and lower sides respectively of the razor head housing (24) and extending laterally to the said direction of movement (25); whereby, the rotation of one of the rollers (21, 22) is transmitted by at least one drive belt (23) to the other roller (22, 21). The invention also relates to modifications wherein at least one roller (21, 22) is power driven.
