Abstract (en)
[origin: EP3444908A1] The invention relates to a module for a slidable electrical outlet, which comprises: an electrical outlet part; a guide system along which the electrical outlet part can slide, the guide system comprising terminals for establishing the electrical connection with the electrical outlet part at points on the path of the electrical outlet part along the guide system; and an element for attaching the module for a sliding electrical outlet to a surface. According to the invention, the guide system comprises at least one guide, and the electrical outlet part comprises at least one recess, the guide being disposed in the recesses.
