Abstract (en)
[origin: WO2017183970A1] The invention concerns nutritional compositions comprising linoleic acid (LA) and alpha-linolenic acid (ALA) in a LA/ALA weight ratio in the range of 0.1 –12 that have a beneficial effect on preventing early life stress induced decline in cognitive functioning in a human subjectand/ that have a beneficial effect on preventing early-life stress induced reductionin neurogenesis in a human subject.
