Abstract (en)
[origin: WO2017183962A1] The invention relates to a vibrating system for installing a foundation element in the ground or decommissioning it therefrom, and method therefor. The vibrating system according to the invention comprises: a vibrating device; a drive operatively connected to the vibrating device and comprising a motor; and a foundation element to be installed or decommissioned, comprising a closing means arranged in the interior of the foundation element for realizing a pressure chamber in the interior of the foundation element.
