Abstract (en)

[origin: WO2017182460A1] The invention relates to a spring element (1) for a vehicle shock absorber. According to the invention, a spring element (1) is proposed, having a longitudinal axis (L) and a main body (3), which extends along the longitudinal axis and can be elastically deformed between an uncompressed base state and a state of compression in the direction of the longitudinal axis and has an end (9) having a stop surface (15a,b) designed for contacting a shock absorber cap of the vehicle shock absorber, wherein the stop surface (15a,b) is structured at least in some sections. The invention further relates to a vehicle shock absorber and to a vehicle, in particular a passenger vehicle, having such a spring element.
