Abstract (en)
A clamp arrangement for releasably securing an accessory to an oscillating power hand tool. The clamp arrangement includes a clamp assembly configured to be coupled to the power tool, and the clamp assembly includes an attachment plate having a first clamp member and a second clamp member. The first clamp member is configured to translate relative to the second clamp member, the attachment plate includes an attachment plate body that provides an attachment plate mating detail, and the attachment plate mating detail comprises a raised annular rim having a central recess and a plurality of receiving portions formed thereon.
