Abstract (en)

[origin: EP3447193A1] Apparatus (200) for emitting light to direct or control road traffic includes a container (202). A laser source (204) emits a laser beam (206) into the container (202). The container (202) holds a substance (208) for dissipating the laser beam (206) emitted into the container (202) by the laser source (204). The container (202) has a transparent wall (212) through which the dissipated laser light can pass.
