Abstract (en)
Disclosed is a connection arrangement (14) of an awning (4). The connection arrangement (14) comprises an awning fabric (6) having a tendon portion (61); a receiving member (16) having a groove (161), wherein the awning fabric (6) and said groove (161) are configured such that the tendon portion (61) is slidable into the groove (161), and a means (18) for reducing a play between the tendon portion (61) and the receiving member (16) along substantially the entire length of the tendon portion (61).
