Abstract (en)
A bit (1) for drilling a wellbore includes: a shank (12) having a coupling formed at an upper end thereof; a body (2) mounted to a lower end of the shank; and a cutting face forming a lower end of the bit. The cutting face includes: a blade (9) protruding from the body; a cutter (15) including: a substrate (17) mounted in a pocket (4) formed in the blade (9); and a cutting table (16) made from a superhard material, mounted to the substrate, and having a non-planar working face with a cutting feature (19); and a cutter orienting system including: a keyway (3w) formed in the substrate and angularly located opposite from the cutting feature; and a key (3k) formed in or mounted to the pocket and engaged with the keyway.
