Abstract (en)

A socket contact (10) for use with a connector, including a body (12) having a first portion (14) having a first end (15), the first portion (14) extending along a first axis (16) for forming a conductive path with a first conductor (40), the first portion (14) extending along a second axis (22) to a hollow second portion (18) having a second end (24) opposite the first end (15), the second portion (18) extending along the second axis (22) to an engagement region (26) near the second end (24) for receiving a second conductor (46). The engagement region (26) forms more than two contact points (28, 34) with the second conductor (46).
