Abstract (en)

[origin: TW201737836A] The invention relates to a tuft picking device (1) which is seen as an improvement in the field of tuft picking devices, said tuft picking device having a tuft picking notch (6) which is variable with regard to its removal cross-section, and to a thus-equipped brush-making machine (2) as well as to a method for removing bristle bundles (7) from a bristle supply (4) and to their transfer to a brush-making machine (2). The tuft picking device (1) according to the invention comprises a pressure piece (15) which is arranged on the tuft picking device (1) between a first edge (16) and an opposite second edge (17) of the tuft picking notch (6) for modifying the removal cross-section of the tuft picking notch (6) while being displaceable in said tuft picking notch.
