Abstract (en)

[origin: WO2017186732A2] An evacuation device for evacuating a sterilizing agent used to sterilize at least one package. The evacuation device comprises an outlet for evacuating the sterilization agent. The evacuation device further comprises a collection unit and the collection unit is connected to the outlet. The collection unit is arranged at the at least one package such that the sterilization agent is evacuated via the collection unit and out through the outlet.
