Abstract (en)

[origin: WO2017186390A1] The invention relates to an electrical system (100) comprising at least two modules (200, 300), wherein a module (200, 300) comprises at least one switching element (210, 310). The first module (200) comprises a first switching element (210) made of a first semiconductor material and the second module (300) comprises a second switching element (310) made of a second semiconductor material.
