Abstract (en)
[origin: GB2549796A] Packaging comprises a sleeve 1 and a re-configurable container 2 comprising first and second boxes 21, 22 which are hinged together and are pivotable between a folded-together and opened out configurations. The container 2 is insertable into and removable from the sleeve 1. The first main panel 211 of the first box 21 has an aperture 217 which provides access to a first compartment 218. The second box 22 has a first edge panel 223 for providing access to a second compartment 228. The arrangement is such that, when the container 2 is inserted in the sleeve 1, the sleeve 1 covers the first edge panel 223 of the second box 22, and, when the container 2 is removed from the sleeve 1, the first edge panel 223 of the second box 22 provides access to the second compartment 228. The package may have an insert 3, inside the second box 22, having projections 311, 312, which brace the insert away from walls of the second box 22, to protect from impact. A tray 6 may be placed within an aperture of the first main box 21. The packaging may house a vaping device and an e-liquid bottle. The packaging may be formed from blanks.
