Abstract (en)
[origin: WO2017186807A1] The invention relates to a self-loading pistol (1), comprising a frame (2), which has on the upper side a carriage guide (5) extending in the longitudinal direction, wherein the carriage guide (5) is suitable to at least partially receive and/or guide a carriage (8) and a tube (9) having a cartridge chamber, the tube (9) is accommodated in the carriage (8) so as to be at least partly located inside, the carriage (8) can be moved in the carriage guide (5) between a front end position (11) and a rear end position (12), the carriage (8) closes the tube (9) in the front end position (11) in the carriage guide (5), the carriage (8) opens the tube (9) in at least the rear end position (12) in the carriage guide (5), and the frame (2) has a carriage catch lever (4) for locking the carriage (8), a trigger device (3), which can be moved relative to the frame (2), and a handle piece (6) having a magazine shaft (10). The frame (2) has a receiving device (13), which receives the carriage (8) at least partly in the rear end position (12). Furthermore, the pistol (1) has a shoulder support (15), which can be connected to the receiving device (13) via a holding device (14).
