Abstract (en)

[origin: WO2017187467A1] An automatic dispenser (1) of product items and of goods is described, comprising at least one automatic positioning system (10) of selected items and at least one delivering device (20) of the items, the automatic positioning system (10) being adapted to allow positioning the selected items near the delivering device (20) of the items at a level which can be easily reached and without impact caused by fall, wherein the delivering device (20) comprises at least one motored door (21) sliding between an open position and a closed position, and guiding means (22) of the door (21) are shaped so that the door (21) closes at least one opening (23) of the delivering device (20) by squashing deformable means (24) to insulate and protect the automatic dispenser (1) with respect to outside.
