Abstract (en)
The present invention provides a braiding machine (1) and a braiding method of a tail-pulling rope. The braiding machine (1) of the tail-pulling rope comprises a machine frame (2), two track plates (3), a plurality of yarn carriers (6) and a rope belt braiding mechanism. The track plates (3) are located on the machine frame (2), and the yarn carriers (6) are mounted on the track plates (3), wherein the rope belt braiding mechanism comprises a turbine speed change mechanism (5), two belt wheels (7) and two transmission wheels (9). A transmission rod (10) is arranged between the two transmission wheels (9); a belt rolling rod (8) is arranged between the two belt wheels (7); a first end of the turbine speed change mechanism (5) is located in a middle of the two track plates (3) and mounted on the machine frame (2); a second end of the turbine speed change mechanism (5) is connected to the middle of the transmission rod (10); and a rubber tube (4) is arranged on the machine frame (2) and located at a center of the track plates (3). The braiding machine (1) of the tail-pulling rope has simple structure, good stability and high yield.
