Abstract (en)
[origin: CN109423775A] The invention relates to a method of forming a profiled non-woven fabric (80), comprising the steps: feeding fibers or fiber flakes in a feeder (22) onto a stock non-woven fabric (12) that is transported to the feeder (22) or directly onto a transport device (10), and forming a profiled nonwoven intermediate (78) incorporating the feeding step. Subsequently, the method further comprises dissolving the profiled nonwoven intermediate product (78) in a dissolving unit (40) and feeding the dissolved fibers or fiber flakes of the profiled nonwoven intermediate product (78) onto a base non-woven fabric (66) or directly onto a conveyor (16), as well as forming the profiled non-woven fabric (80) involving the dissolving and feeding step.
