Abstract (en)

A method of controlling a washing machine characterized by three sequential control levels, wherein in the first level a washing program is selected, in the second level a washing parameter available for the selected washing program is selected, and in the third level a value of the selected washing parameter is changed, wherein the selection and adjustment are performed by rotating a selection ring and confirming the selected or adjusted program, parameter, value and the switching between the three selection and adjustment levels is performed by activating a confirmation button.
