Abstract (en)  
Provided is an induction heating cooker capable of detaching a body from below a top unit relatively safely. Induction heating cooker (10) includes: top unit (20) having top plate (22); and body (30) for storing heating coil (32) for induction heating, body (30) being detachably supported vertically below top unit (20) by first support member (11) and second support member (21). Body (30) is positioned by first support member (11) so as to hang on top unit (20). Body (30) is fastened to top unit (20) by second support member (21).
