Abstract (en)
[origin: WO2017190960A1] The invention relates to a floor treatment system, comprising a mobile floor treatment device (14) and a docking station (12) for said device, wherein the floor treatment device (14) has at least one liquid container (66, 70) with a container wall (78, 90) and a container interior (80, 92), the docking station (12) comprises at least one feed line (18), via which a liquid can be fed to the container interior (80, 92) when the floor treatment device (14) is in the docked position at the docking station (12), the floor treatment system (10) comprises an opening means (48), via which a wall section (102, 104) of the container wall (78, 90) can be moved into an open position to expose at least one container opening (82, 94) of the at least one liquid container (66, 70), via which container opening (82, 94) the liquid can exit the container interior (80, 92) when the floor treatment device (14) is in the docked position, and wherein the wall section (102, 104) can be transferred into the open position by means of the opening means (48) by moving the floor treatment device (14) from a non-docked position to the docked position.
