Abstract (en)
[origin: WO2017192841A1] The invention provides methods of treatment and combination therapies using heterobicyclic and related compounds that activate Gcase, such as in the treatment of endometriosis and Parkinson's disease. An exemplary heterobicyclic compound that activates Gcase is a substituted pyrrolo[1,2-a]pyrimidine compound, such as substituted 2,4-dimethyl-N-phenylpyrrolo[1,2-a]pyrimidine-8-carboxarnide compounds and variants thereof.
