Abstract (en)

[origin: WO2017191190A1] The invention relates to a transport device (101) for transporting sacks or bags, comprising at least one transport element extending in the transport direction (z), which transport element lies on a bottom (120, 120') of the sack (102) or bag, and an abutment, against which the transport element presses the sack (102) or bag with a pressing force. The pressing force (provided by the transport element) is reduced in at least one area of the bottom (120, 120').
