Abstract (en)  
[origin: WO2017191066A1] The invention relates to an arrangement (100) consisting of a connector housing (10) and a cylindrical, overmoulded adapter sleeve (20) for screwing onto the connector housing (10), wherein the overmoulded adapter sleeve (20) has a thread (22) at one end (21a) for connection to a mating thread (12) of the connector housing (10), and the overmoulded adapter housing (20) has an inner channel (23) through which a cable (30) can be passed, wherein a plurality of ribs (25) and/or grooves (26) are furthermore provided on the outer lateral surface (24) of the overmoulded adapter sleeve (20), and the region with the ribs (25) and/or grooves (26) is suitably designed to be overmoulded with a plastic together with a cable (30) in an overmoulding die.
