Abstract (en)
The ceiling lamp consists of at least one module that includes a mounting plate (1) provided with at least one light source (2) placed in the reflector (3), a faceplate (4) and profiled side strips (5). The edges of the mounting plate (1) and the faceplate (4) are covered by side strips (5) which at the ends are cut obliquely so that the two adjacent ends of the side strips (5) cover the corners of the mounting plate (1) and the faceplate (4). The adjacent ends of at least two side strips (5) are connected by a coupler (6) consisting of at least two arms (7), recessed into the ends of the side strips (5).
