Abstract (en)  
[origin: CN109471348A] The invention relates to a clock device adapted to indicate the position of a heavenly body, characterized in that it comprises: a circuit (1) for determining a current time, a circuit (2) for determining a geographical position of the clock, means (4) adapted to determine the position of the heavenly body according to the current time and the geographical position of the clock, a display system comprising a first hand (8a), a second hand (8b), and means (8c) adapted to drive said hands in rotation in a main plane (XM, YM) of the clock device and display the determined position of the heavenlybody.
