Abstract (en)
[origin: WO2017194994A1] The present disclosure concerns a process for producing fermented soy product comprising: providing soy based raw material; extracting oil from the soy based raw material to obtain defatted soy material; adding water such that the defatted soy material has a humidity that is between 20 wt.% and 80 wt.%; adding yeast in a concentration between 0.1 wt.% and 20 wt.% to the defatted soy material to obtain a fermented soy product; and drying the fermented soy product until the fermented soy product has a humidity that is less than 12 wt.%; such that the fermented soy product comprises less than 0,5 wt.% of stachyose and raffinose, more than 18 wt.% of Fructooligosaccharides and less than 24 wt.% carbohydrates. The present disclosure further concerns the fermented soy product obtained by the process and the use of the fermented soy product as an ingredient in food formulations.
