Abstract (en)  
[origin: WO2017194575A1] The invention concerns a support housing (1) for sampling cones for a pipetting system, the housing being intended to be stacked with other identical housings in a stacking direction (2), and comprising: a support (10) provided with openings (12) for housing the sampling cones; first and second opposing side walls (14a, 14b) traversed by a virtual median plane (P). According to the invention, each of the first and second opposing side walls (14a, 14b) is equipped with a female coupling member (18) and a male coupling member (20) arranged substantially symmetrically to either side of the plane (P), the two female coupling members (18) of the first and second opposing side walls (14a, 14b) being arranged to a same side of the plane (P) and the two male coupling members (20) of the first and second opposing side walls being arranged to the other side of said plane (P).
