Abstract (en)
[origin: WO2017194714A1] Sewing machine for making functional and/or decorative seams, comprising a bearing frame whereon one sewing head provided with a sewing template, a loading clamp, a work surface and a support arm are suitably installed; said support arm supporting said loading clamp and extending above the work surface, in such a way to maintain the surface of said work surface free from obstacles and/or impediments, in order to indistinctly sew women and men's clothing items, or relative parts, generally distinguished by an asymmetrical arrangement of elements or components, such as pockets, small pockets, slots, buttons, collars or the like.
