Abstract (en)
A refrigerator is disclosed, including a door body (1) including a pair of protruded fixing portions (11) and a storage rack supported (2) on the door body (1). The storage rack (2) includes hanging portions (21) adapted to be supported on the fixing portions (11), and the storage rack (2) includes a locking portion (22). The fixing portion (11) has a stop portion (11a) for stopping the locking portion (22) from moving upwards, to prevent the storage rack (2) from moving upwards. The foregoing solution is used to fix the storage rack (2) in a more convenient manner with lower costs compared with a manner of fixing by using an adhesive tape.
