Abstract (en)
[origin: EP3457496A1] The invention relates to an electrical connector 1 comprising a first connecting part 100 and a second connecting part 200, 300, 400 adapted to mechanically couple together in a first predetermined relative position, wherein a decoupling is prevented by locking and positioning ensuring means. A decoupling of the first connecting part 100 and a second connecting part 200, 300, 400 is rendered possible when the first connecting part 100 and a second connecting part 200, 300, 400 are arranged in a second predetermined relative position.
