Abstract (en)

[origin: WO2017201207A1] Systems, devices, and methods are provided that relate to aircraft with modular cabins and modular distributions. The aircraft may include a set of modules and a centralized utility bus. A module creation ecosystem may be provided that provides module designers with information about module dimensions, utilities and design rules. Considerations for designing, certifying, selecting, distributing, building, and installing modules in or for an aircraft are set forth.
