Abstract (en)
[origin: WO2017198280A1] The invention relates to an order-picking system for order-picking goods into dispensing containers (5) in an order-related manner, comprising a plurality of automated order-picking cells (1), a first conveyor system (2) for supplying and/or discharging the supply containers (4) to and/or from the order-picking cells (1), a second conveyor system (3) for supplying and/or discharging the dispensing containers (5) to and/or from the order-picking cells (1), and an order management controller for carrying out a plurality of order-picking orders by actuating the first and second conveyor system (2, 3) and the plurality of order-picking cells (1). At least one first order-picking cell has different goods handling properties than a second order-picking cell and/or the order management controller uses at least one first order-picking cell to carry out different orders and/or sub-orders than a second order-picking cell.
