Abstract (en)

[origin: WO2018011029A1] The invention relates to a device for decelerating the movement of a wear device, in particular of a motor vehicle, having a catch strap for limiting the movement of the wear device, having at least one brake lever, which is mounted about a deflection axis such that the brake lever can be deflected, and which has an actuating section and a clamping section, which can be deflected in the direction of the catch strap, and a counter bearing which, together with the clamping section, serves to clamp the catch strap.
