Abstract (en)

[origin: WO2017198706A1] The gas storage container (112) for a vehicle on-board system comprises a canister (114) configured to house a solid medium able to store gas by adsorption and/or by absorption and to release the gas by desorption and a gas absorbing and/or adsorbing element comprising a material able to trap the gas and extending, at least in part, around the canister and a spacer interposed between the canister (114) and the absorbing and/or adsorbing element so as to form a gas diffusion layer defining a free space between the canister (114) and the element that is absorbing and/or adsorbing towards the gas.
