Abstract (en)
[origin: WO2017198761A1] The invention relates to a lighting device for attaching to a building wall, comprising a mounting frame (1), which has a back wall (3) and which is provided with a transparent plate (4) on the visible side of the mounting frame, wherein at least one LED and a reflective surface (7) are arranged in the mounting frame (1). According to the invention, the LED is fastened to the mounting frame (1) and is designed as a strip (5) or band. The reflective surface (7) is formed by a reflector film, which has a structured surface on the side of the reflector film facing the plate (4).
