Abstract (en)

[origin: WO2017198048A1] Pixel unit, array substrate, and display device, and their fabrication methods are provided. The disclosed pixel unit can include: a transistor (2), including a drain electrode (21); a pixel electrode (3), including a first bottom conductive layer (311) in contact with a surface of the drain electrode (21) and a metal layer (32); and a planarization layer (4), formed on the transistor (2) and the first bottom conductive layer (311). The metal layer (32) is electrically connected to the first bottom conductive layer (311) through a via-hole in the planarization layer (4).
