Abstract (en)
[origin: EP3459396A1] A bed with canopy, including a canopy, a bed, a solar energy converter, a power storage device, a controller, and a power consumer device is described herein. The bed is disposed below the canopy. The solar energy converter is disposed on the canopy. The power storage device, the controller are electrically connected with the solar energy converter. The power consumer device is electrically connected with the power storage device. The bed with canopy of the present invention not only remains the shielding function of the canopy and the lying or sitting function of the bed, but also a charging device utilizing solar energy is added for powering a power consumer device, the power consumer device is used cooperatively with electronic products to realize diversified functions of the electronic products such that more functions is expanded to meet the needs of users on diversified products.
