Abstract (en)

The present invention relates to passivation system (1), configured to passivate a steel plate (2), comprising: - a compressor (3) with a lubricant (4) that is passivation inhibiting; - a passivation unit (5); - an expelling device (8), arranged between the compressor (3) and the passivation unit (5), and configured to remove the lubricant (4) from the steel plate (2); - wherein the expelling device (8) comprises a blower (9) that is configured to blow the lubricant (4) away from the expelling device (8) and off of the steel plate (2).
