Abstract (en)
[origin: EP3461959A1] An overflow device (10) comprises a ring-shaped mounting portion (20) adapted to be mounted below the drain of a washbasin; and a rigid pipe (30) connecting to the ring-shaped mounting portion at a first end (34) of the rigid pipe (30). By providing a flexible extension pipe (40) connecting to the rigid pipe, wherein one of the rigid pipe (30) and the flexible extension pipe (40) has a knee portion (32), an overflow device which is inexpensive to manufacture, which is easy to assemble to the washbasin and which has good flow properties is obtained.
